- Visual Studio Code, AWS, GitHub, NGINX

### Education

**DigitalCrafts** | Full Stack Immersive Program | Houston, TX

March 2019

- Full stack Development program offering 16-week accelerated immersive training

**The University of Houston** | B.S. in Computer Engineering Technology

May 2021

### Software Development Portfolio

**ScoreHop** | [github.com/j-argote/ScoreHop](https://github.com/j-argote/ScoreHop)

- Member of a 3-person development team building a dynamic front-end web application to locate breweries near an event
- Responsibilities included accessing, analyzing, and retrieving data from Open Brewery DB API to display the breweries based on the event's location on a map. Implemented clickable beer icons on the map with options for directions through google maps.
- Front-end project built with HTML, CSS, JavaScript, JQuery, Bootstrap, Open Brewery DB API

**Burnify** | [github.com/gysobu/BeatBurner](https://github.com/gysobu/BeatBurner)

- Collaborated in a 3-person development team building a fitness web application allowing users to create an account, pick a music playlist based on difficulty, and display the calories per song and total calories the user can burn on average
- Responsibilities included authenticating the user using Passport.js to sign-up/login to the application. Created the database to store user's sessions and information upon registration. Retrieved data from database and designed an algorithm to calculate the average calories and total calories burned dependent on the weight and age of the user.
- Back-end project with HTML, CSS, JavaScript, JQuery, Bootstrap, Node.js, Passport.js, Express, EJS, Sequelize, PostgreSQL

• **Blackjack** | [github.com/j-argote/javascript-blackjack](https://github.com/j-argote/javascript-blackjack)

- Classic Blackjack game allowing users to play against the computer with the options to deal, hit, or stand.
- Designed the front-end of the website and implemented clickable buttons to deal, hit, stand, and to play again. Devised a plan by analyzing each step-in Blackjack. Tested and debugged the code while programming the functionality of the game.
- Front-end project built utilizing HTML, CSS, JavaScript, JQuery, Bootstrap

### Employment History

**First Community Credit Union** | Teller | Houston, TX

September 2009 – November 2018
